# BIOMES POSTER

## Life Science

### Objective:

Students are to create a poster of an assigned Biome.

Students will be working in groups of 2.

### **Requirements:**

Each poster must include the following: (30pts)

1. Average rainfall
2. Average temperature
3. Location on Earth (provide a global map)
4. Typical plants (labeled pictures)
5. Typical animals (labeled pictures)
6. Special features

Students will have 2 class periods to work on the poster. During this time, they will be researching their biome and working with their partner on creating a poster. (20pts)

Students will present their assigned biome to the class. (25pts)

- Each student is responsible for presenting a portion of the biome.
- Partners will decide whom will present which part of their assigned biome before hand.
- Must be prepared to answer questions on their biome.
- Students will be respectful while other students present projects.
